

FOR IMMEDIATE RELEASE

Randall G. Conway, DoD CIO Executive, Joins Suss Consulting

JENKINTOWN, PA., November 26, 2018 – Suss Consulting, a leading provider of federal IT strategy, market research, capture and proposal services, today announced the addition of Randall G. Conway as a Principal Consultant. Mr. Conway served most recently as the Department of Defense Deputy Chief Information Officer for Information Enterprise (DCIO-IE).

“Randy’s experience and insight gained as a leader on DoD’s top IT initiatives, including the Joint Information Enterprise (JIE), the Joint Regional Security Stack (JRSS), the Mission Partner Environment (MPE), cloud computing, and enterprise services will provide invaluable help to our clients in the design, implementation, and operation of DoD’s next generation IT infrastructure and capabilities,” said Warren Suss, President of Suss Consulting.

As the DCIO-IE, Mr. Conway, a member of the Department of Defense (DoD) Senior Executive Service (SES), provided technical expertise, policy guidance, and leadership to drive Office of the Secretary of Defense (OSD) processes and actions to realize an integrated Department - wide implementation of the Joint Information Environment (JIE) and its two primary sub-components called the Joint Regional Security Stack (JRSS) and the Mission Partner Environment Information System (MPE-IS). Additionally, he led the CIO priorities in the areas of cloud computing, architecture development, and enterprise services for the larger DoD Information Enterprise. He supervised the development of implementation plans, budgets, their execution, measurements, resourcing strategies. He ensured that DoD-wide information technology standards were prescribed and enforced and recommended the elimination of duplicative IT systems within the DoD information environment.

Prior to assuming this position, Mr. Conway served as the Principal Director to the DCIO-IE for all JIE activities and the Director for Command, Control, Communications, and Computers (C4) and Information Infrastructure (C4II). In his capacity as Director, he set priorities and direction in the areas of aerial, space, and terrestrial communications capabilities; command and control systems and mission applications; Defense Information Systems Network (DISN) services and gateways; network management and operations; position, navigation, and timing (PNT); commercial mobile devices and wireless; and personnel recovery systems. This included policy development, technical analysis, assessments, strategic direction, standards development, and architectural representations within each area.

Mr. Conway served 26 years in the Army Signal Corps in leadership, command, and staff positions within DoD where he earned numerous military awards, decorations, and honors. Upon retirement, Mr. Conway joined the MITRE Corporation and served two years supporting the Defense Information Systems Agency and the Assistant Secretary of Defense for Networks and Information Integration on many high visibility IT issues and projects. He joined the Federal Government in 2008.
